### Question No. 1

Universal Containers uses Community to grant customers secure access to their accounts, orders, and invoices. All customers are on a Customer Community License. Universal Containers needs to grant a subset of their customers, known as affiliates, access to other customer Accounts. How should a Salesforce Admin fulfill these requirements?

- **A.** Leverage the Account team to grant affiliates access to the Account.
- **B.** Use Apex without sharing to control affiliates' access to the Account.
- **C.** Create a public group for affiliates and grant Account access using sharing rules.
- **D.** Add a Sharing Set on the Account associated to the Affiliate profile.

**Answer: C**

### Question No. 2

Universal Containers allows Guest users to create cases in the Customer Service Community. The Salesforce Admin is getting feedback that the current case page has unnecessary fields for guest users. How should the Salesforce Admin address this issue?

- **A.** Create a new Case page in Community Builder and include required fields.
- **B.** Create a Global Action and update the layout to include required fields.
- **C.** Create a record type for Guest users and associate to the Case page layout.
- **D.** Create a custom case page for Guest users and add required fields.

**Answer: C**

### Question No. 3

Universal Containers uses Community to grant business Customers Secure access to accounts, Orders, and invoices. All Customers are On a Customer Community License. Universal Containers plans to launch a project management module with the following requirements: \* Leverage Chatter for collaboration. \* Private project collaboration between the customer and Universal Containers. \* Leverage documents, tasks, and events in the project space. \* Customers can only see and access their projects. What is the most efficient way for the Salesforce Admin to fulfill these requirements?

- **A.** Use custom objects, record feeds, and control access through sharing.
- **B.** Create unlisted groups and add project records to the group.
- **C.** Build a custom Visualforce project space and control access through sharing.
- **D.** Add private groups and add project records to the group.

**Answer: A**

### Question No. 4

Universal Containers needs to use their corporate portal to authenticate Community users, allowing users access to the Community after they have successfully logged into the Portal. What should the Salesforce Admin do in the Communities to support this login requirement?

- **A.** Add Social-Sign-on to allow users to log in from the Portal without signing into the Community.
- **B.** Enable Guest User access in Communities to support seamless access to Communities from the Portal.
- **C.** Configure Single Sign-on in Salesforce and reuse the federated authentication providers in

the Community.

- **D.** Enable Community login support for employees in the Portal configuration.

**Answer:** C

### **Question No. 5**

Universal Containers built a Community on the Customer Service Template. The Salesforce Admin customized a few pages by adding custom-built Lightning components. The Salesforce Admin upgraded the template to the latest version. What is the status of the custom Lightning components on the page after the upgrade?

- **A.** The Lightning components are on the page and load as expected.
- **B.** The Lightning components are NOT on the page, but are available in Community Builder.
- **C.** The Lightning components are on the page, but will NOT load until the Community is published.
- **D.** The Lightning components are neither on the page nor in Community Builder.

**Answer:** D
